

Aleksandr Chapkin *DevOps / Platform Engineer*

work@reisei.me • Berlin • Germany

github.com/reisei • linkedin.com/in/achapkin

English (*full professional proficiency*), German (*A1*), Russian (*mother tongue*)

DevOps / Platform Engineer with 15 years of experience across the full stack of infrastructure — from embedded Linux on ARM devices to cloud-native Kubernetes platforms. CKA certified. I'm equally comfortable diagnosing operational incidents and writing code that solves business problems, having contributed to production Elixir, Python, and Bash codebases throughout my career.

Skills

- Infrastructure design with high availability and high load consideration
- Linux administration: Ubuntu, Debian, CentOS, Gentoo
- Application containerization and orchestration: Docker, Kubernetes (managed and self-hosted), Argo Workflows, Argo Events, Karpenter
- Jenkins, GitLab CI/CD, GitHub Actions/Workflows: setup, fine-tuning, implementation of different git workflows
- Infrastructure as code: Terraform, Helm, Ansible
- AWS, Azure, Hetzner cloud providers
- Prometheus, Grafana, Elasticsearch/OpenSearch; distributed tracing
- Postgres and MySQL from the operations perspective
- Bash, Python

Experience

Phrase (BERLIN, GERMANY)

Nov '23 – Present

DevOps Engineer

- Implemented autoscalability with Karpenter for the Argo Workflows and Argo Events based engine; reduced resource consumption by ~2/3 in QA/staging environments and ~1/3 in production
- Improved Engine stability through fine-tuning of Argo Workflows parameters
- Developed custom Elixir metrics for Engine observability

Spark Networks (BERLIN, GERMANY)

Sep '22 – Oct '23

DevOps Engineer / SRE

- Wrote tests for a custom Terraform module using Terratest, significantly improving confidence in infrastructure changes
- ArgoCD implementation and migration of applications to Kubernetes
- Maintained Gitlab CI/CD pipelines and Ansible playbooks

Abbyy (MOSCOW, RUSSIA)

Oct '20 – Sep '22

DevOps Engineer

- Maintenance and improvement of the Kubernetes monitoring with Elasticsearch, Fluentd, Fluent Bit and Kibana
- Transition to Opendistro/Opensearch: architecture design and implementation
- Implementation of Distributed Tracing infrastructure
- CI/CD pipelines for different projects: multi-architecture applications, pipelines for install/upgrade of k8s services
- Writing ansible playbooks and helm charts

Dvhh (MOSCOW, RUSSIA)

Dec '17 – Oct '20

System Administrator

- Sole infrastructure owner at a product agency: responsible for deployment architecture across all client projects
- Introduced Docker and subsequently Kubernetes to the company, migrating all active projects
- Administered all self-hosted internal tooling: GitLab, Jira, Confluence, Sentry
- Contributed features to an internal sprint planning application
- CI/CD pipelines in GitLab and Jenkins; Sentry setup and configuration

Tensor (YAROSLAVL, RUSSIA)

Dec '16 – Dec '17

Junior Software Developer

- Python development: bug fixing across the internal toolset
- Implemented a JSON parser for an internal data processing tool

I-camp Engineering (YAROSLAVL, RUSSIA)

Oct '11 – Dec '15

System Engineer

- Linux configuration for custom ARM devices, cross-compilation of the necessary packages and libraries for the company's smart home application, fine tuning of the peripherals drivers
- Servers administration for the development team (Jenkins configuration and pipelines writing, Postgres administration)
- Creation of the custom update procedure for the company's app
- Redmine setup and configuration for the development process

Education

Yaroslavl Demidov State University (YAROSLAVL, RUSSIA)

2004 – 2009

Specialist degree in Microelectronics and Semiconductor Devices
